

Magura X-Line Bulge Bars

Features:

1. Extremely light, stable, butted alloy handlebar reduces rider fatigue
2. Easily installed bar mounts provide an alternative to replacing expensive top triple clamp
3. Bars are 1 1/8" bulge diameter which are suitable for standard size grips and controls
4. Bars are constructed of 7075 T-6 aluminum
5. All are light titanium in color
6. Bar pads are available in various colors.
7. Multiple bends SX, MX, EX, JX
SX-Similar to CR-style with aggressive racing bend
MX2-Similar to CR- Hi with forward geometry bend
MX-Similar to CR-Lo with more pullback
EX-bend designed for Enduro-High
JX-bend for junior racers
